

Homework QA Mobile

Please review and complete the following tasks:

1. Create test plan and test cases for flow to complete wallet creation for TrustWallet Android App:

Welcome screen -> Legal screen -> Set Passcode screen -> Confirm Passcode screen -> Consent screen -> Recovery phrase -> Confirm recovery screen

2. Download Android TrustWallet apk file from <https://trustwallet.com/>.

Implement automated UI testing based on your test plan. It's suggested to use Appium framework. If for any reason you prefer to use another automation tool, be ready to explain reasons behind this decision.

3. Use Github repository for autotests and test plan storing and sharing with us

Feel free to reach out if you have any additional questions regarding this homework.
